

COILCARE

UV HVAC Virus Shield

A natural solution for chemical resistant infectious diseases.

Add UV Virus Shield and keep your cooling system clean & efficient with BSG COILCARE.

- UV-C protection – no ozone, no plasma
- Improved indoor air quality
- Better protection for everyone in your building
- More energy efficiency with automated cooling coil disinfection

PERFORMANCE

AIR QUALITY

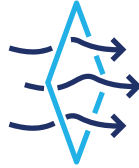

ENERGY SAVINGS

BSG COILCARE provides **completely automated and chemical-free cooling coil maintenance** with an added level of **protection against airborne virus particles and bacteria.**

Benefits of BSG COILCARE: By the numbers

**Improving Delta T
up to 35%**

**Improving heat transfer
up to 50%**

**Reducing pressure drop
up to 50%**

BSG COILCARE Delivers:

- Automated, chemical-free cleaning and disinfecting of HVAC equipment, including cooling coils, drain pans, and ventilation ductwork
- Prevents accumulation of biofilm and eliminates 99% of microbial bacteria and fungi
- Optimizes HVAC system performance
- Increased energy savings & improved indoor air quality

Versatile yet simple

Designed to be simple and quick to install on site or in the factory.

Then it's as simple as replacing the UV lamp at recommended times and you'll never need to clean your coils again.

***Note:** These are actual results from multiple installations, confirmed over years of rigorous product use in the field.
