

INDUCT: ENHANCE THE AIR YOU BREATHE FROM A CENTRAL POINT

Automated, chemical-free cleaning for indoor air fed through HVAC systems.

CONTINUOUS AIR PURIFICATION:

Treats all air being fed into an indoor space from a central point, reducing odour and micro-organisms.

ELEVATED INDOOR AIR QUALITY:

Neutralises contaminants, fostering a cleaner and healthier atmosphere conducive to productivity and well-being.

ENHANCED AIR QUALITY ASSURANCE:

Safeguards businesses, customers, and staff by delivering pristine, bacteria-free air throughout facilities, ensuring a healthier indoor environment.

SCALABLE, NON-INVASIVE SOLUTION

Requires a simple install within fresh, supply and/or return air ducts. Multiple units can be utilised to achieve the required disinfection rate.

KEY BENEFITS:

- **Seamless Air Disinfection**
- **Scalable Solution**
- **Non-invasive, Simple Installation**
- **Improves Indoor Air Quality**
- **Enhances Hygiene**

KEY FEATURES:

- **ASHRAE Recommended:** Meets standards for hygiene.
- **Kills 99% of Microbes:** Eliminates bacteria & viruses for clean air.
- **Sustainable Solution:** No harsh chemicals.

TECHNICAL SNAPSHOT:

9,000-hour lamp life: Long-lasting and reliable.

Scalable & Customisable Solution: Uses patented UV Calc technology to model and design the optimal system for your setup, ensuring targeted disinfection rates and maximum efficiency.

HOW IT WORKS:

- 1** UV-C technology breaks down biofilm and microbial contaminants.
- 2** Photoplasma spreads throughout the ducting and facility to remove odours and particles.
- 3** Air quality and hygiene is improved within the facility.
